

Dikshant Raj Meena

Computer Science and Engineering | IIT Kanpur | dkrajmeena27899@gmail.com | 6377328958

SKILLS

PROGRAMMING

Languages:

Typescript • Javascript • React

NodeJS • C++ • C • Python

Frameworks:

React • Vue • MATLAB • AWS

Database:

Cloud Firestore(Firebase) • MongoDB

MySQL • GraphQL

Utilities:

Git • $\LaTeX$ • Material Jest Enzyme •

Docker-Compose

Operating System:

macOS • Linux • Windows

EDUCATION

IIT KANPUR

B. TECH IN COMPUTER SCIENCE ENG.

2023 | Kanpur, India

CLASS XII RBSE

2017 | Bal Sen. Sec. School, Kota

CLASS X RBSE

2015 | Bal Sen. Sec. School, Kota

ACHIEVEMENTS

JEE ADVANCED'18

AIR 4754

Among 1.72 Lakhs top JEE Mains qualified aspirants.

JEE ADVANCED'18

AIR 32

Among 1.72 Lakhs top JEE Mains qualified aspirants from all over India in ST.

COURSES

Algorithms -II • Compiler Design

Operating System • Modern Cryptology

Introduction to Machine Learning

Principle of Programming Languages

Data Structure & Algorithms

Fundamentals of Computing

POSITION OF

RESPONSIBILITY

ORGANISER, UDGHOSH'22 | WEB DEVELOPMENT

- Spearheaded a 3-tier team of 20+ developers to expand marketing outreach and develop 6 different websites using ReactJs

- Orchestrated events such as Aavegh, Unosq to expand the outreach of Udghosh to about 1 million

EXPERIENCE

GOALZEN CAPITAL SERVICES PVT. LTD | SENIOR SOFTWARE DEVELOPER

July 2025 – Present | Hyderabad

Mutual Fund Intelligence Engine (Backend)

- Engineered a scalable, layout-agnostic ETL pipeline using Pandas with heuristic header detection and chunk-based streaming, enabling efficient extraction, normalization, and incremental MongoDB upserts for portfolio data across **47+ AMCs** covering **2,000+ schemes**.
- Developed a scalable **Node.js** and **Express** backend to process monthly **Mutual Fund disclosures** and track stock movements (Added, Removed, Increased, Decreased).
- Designed advanced **MongoDB aggregation pipelines** to calculate sector-wise **AUM** along with average percentage contribution to **NAV**.

Quantitative Analysis & Optimization

- Designed and built an optimization pipeline combining Grid Search and **Monte Carlo simulations (500+ runs)** to test and refine portfolio weights under different scenarios.
- Created an Efficient Frontier module to identify portfolios that balance risk and return by maximizing **Sharpe Ratio** and minimizing **volatility**.
- Developed a **Walk-Forward Optimization** framework with a 12-week rolling window to validate strategy performance on unseen data and reduce overfitting.
- Used **OLS regression** to analyze how different **momentum factors (15D–3M)** impact portfolio returns and risk-adjusted performance.

Statistical Data Modeling (Python)

- Built a **Python-based analytical engine** leveraging **SciPy** to analyze Smallcase subscriber behavior and investment patterns.
- Implemented **Skewness, Kurtosis, and Mode Price Buckets** to understand investor positioning and price distribution.

Financial Indicator Tracking System

- Developed automated system for **10+ technical indicators** (RSI, MACD, EMA 20/50/200) across multiple timeframes.
- Created portfolio health monitoring with **Watch, Worry, Clean** status flags based on RSI crossovers and EMA price action.

GOALZEN CAPITAL SERVICES PVT. LTD | SOFTWARE DEVELOPER

Sep 2024 – July 2025 | Hyderabad

Smallcase Tracking & Analytics

- Designed and developed Tracking System using **Node.js**, **Express.js**, **MongoDB**, and **ReactJs**.
- Implemented **Comparison Charts** (Line, % Return, Quadrant) and internal **B2B tools** for portfolio monitoring.

Data Visualization & API Integration

- Developed Industry Allocation **Pie Charts** and **interactive Portfolio Timelines** with price changes and entry/exit dates.
- Integrated **Zerodha API** for historical data and streamlined Node.js to Python communication for efficient processing.

THE SMART TRAVELLER | WEB DEVELOPER

June 2022 – Aug 2022 | Remote

UI Design & Location Services

- Designed responsive UIs with **ReactJs/Redux** and integrated **G-Maps API** for real-time navigation and location-based services.
- Implemented **Firebase Cloud Messaging** for push notifications to boost engagement.

Architecture & Quality Assurance

- Orchestrated **MongoDB Cloud with Realm** for storage and retrieval of user content.
- Collaborated with QA for unit testing and bug resolution, improving app stability across diverse devices and operating systems.
